Professionals Summary

Bachelor of Information Technology graduate from Monash University (Dec 2024) with a strong passion for game development and 3D art. Proficient in Unreal Engine 5, Unity, Maya, and Blender, with a proven track record of delivering full-cycle game projects, including 3D modeling, VFX, and level design. Experienced in VR/AR animation Customer Service, AI training and immersive environment creation. Currently holding a Temporary Graduate Visa (Subclass 485) and available for full-time employment.

Technical Skills

- Game Engines: Unreal Engine 5 (VFX, Blueprints, Rendering), Unity (Playmaker, Animation, Particle Systems)
- 3D & VFX: Maya, Blender, Substance Painter, 3D Modeling (Characters, Environments, Props), UV Mapping, Texturing
- Programming & Web: C++, JavaScript, Web Development (HTML/CSS), AI, Python
- Design: Level Design, System Balancing, Board Game Design, UI/UX Design
- Soft Skills: Project Planning, Team Leadership, Problem Solving, Team management, Co-operation
- Community management skills: familiar with Discord、BiliBili and other social software, able to manage Discord groups and handle almost all functions in Discord.
- Communication skills: Familiar with how to communicate and serve customers/clients well, and good at solving different situation between team members. Able to work in a fast pace、heavy pressure and complicate environment.
- Motorhome Repair and sales: Familiar with different tools and devices about vehicle repair. And I also understand the sales skills towards different customers as a sales representative.

Professional Experience

Tutor & Client Service Representative | Baiyu Education Institution | China | June 2025 – Feb 2026

- Delivered personalized mathematics, Basic Programming and English tutoring to high school students, improving their academic performance.
- Acted as a liaison between students and parents, effectively communicating progress and addressing client concerns to ensure satisfaction.

Freelancer AI Trainer | LDP AI | Online(Remote) | Sep 2024 – Jan 2026

- Use my voice to train new AI model to enhance their ability to understand voice command
- Use my mobile app experience in university to set up the navigation and map functions for the AI model

Motorhome Repairman & Sales Representative | Golden Finger Caravans | Melbourne | May 2026 – June 2026

- Use my professional knowledge with different tools to repair motorhome's wheel, ladders, tank and furniture.

- Use my professional sales skills to recommend our products to customers and offering amazing service.

Python Tutor | Play AI | Melbourne | May 2026 – Now

- Use my professional Python and 3D modelling knowledge to teach students from age 8 - 22
- Use my game development experience to guide students between 14 - 22 to complete their game competition projects.

Courier & Designer | Uber | Melbourne | Sept 2026 – Now

- Food Delivery
- UI/UX Design

Projects

Dungeon Ghost Hunter (2D Pixel Game) | Unity

[<https://github.com/Vril2563/2d-game>]

- Weapon & Combat System: Designed a balanced weapon system featuring a slow-firing pistol (6 bullets, quick reload) and a high-damage rifle (slower reload). Implemented bullet physics and collision detection.
- Health & UI: Developed a visual health system using pixel art hearts (3 hearts, 0.5 points each) with audio feedback. Programmed health pickups and death spawning mechanics.
- Level Design: Created a modular dungeon layout with interconnected rooms. Implemented a "Roguelike-lite" mechanic where players must clear each room to unlock the next path.
- Visual Aesthetics: Hand-drew pixel art assets for environments (purple floors, stone walls) and UI elements to ensure cohesive game art style.

VR Arena Animation (Immersive Experience) | Unity

[<https://github.com/Vril2563/VR-Animation>]

- Environment & Lighting: Constructed a mountainous terrain and night skybox. Utilized Directional Lights and Point Lights to set a dramatic nocturnal atmosphere.
- VFX & Particles: Created complex particle systems including ambient dust, animated fire circles (with motion blur and HDR), ghost effects, and gladiator foam animations.
- Post-Processing: Enhanced realism using Color Grading (+20 Temp), Bloom, Grain, and Ambient Occlusion.
- Animation: Rigged and animated 3D assets including a rotating artifact/core and falling swords using Sequencer.

Board Game Designer | Monash University Faculty of IT | Melbourne, VIC

- Collaborated in a team to design a board game, winning an Honors Prize in the academic course.
- Spearheaded Level Design, Narrative Storytelling, and Character Balance to ensure engaging gameplay.

Game Jam Participant | Ubisoft Game Jam AU 2024

- Contributed as Level Designer and System Balancer for a 2D dungeon crawler game developed within a tight deadline.

Education

Bachelor of Information Technology | Monash University | Melbourne, VIC | Graduated: December 2024

Relevant Coursework

Javascript, C++ Programming, Web Development, System Development, Team management, Mobile Development

Visa Status

Temporary Graduate Visa (Subclass 485) – Expiry Date: 25/03/2027 - Full Work Rights

Dear Hiring Manager,

As a Bachelor of Information Technology graduate from Monash University (December 2024), I am writing to express my strong interest in a role within your team. Holding a Subclass 485 Temporary Graduate Visa with full work rights which will expire at 03/25/2027

During my studies, I specialized in Game Development, where I cultivated a robust skill set that bridges artistic design and technical implementation. But thanks to my work experience, I am confident I can contribute effectively to your team in other areas:

- Writing and shows.: I am familiar with scripts, hooks, titles, short-form copy. I know how to structure words that hold attention. I know how to edit videos and write stories that can catch audience's attention and keep attracting them to watch a full video. I did a lot in university to make trailers for different projects I participated.
- AI Training: I worked for LDP AI Tech as an AI trainer since I haven't graduate from university. I am familiar with the process of using voice to train AI model (both English and Chinese).
- Motor vehicle general repair and sales: I am working in an motorhome repair company called Golden Finger Caravans in Melbourne. My role is motorhome repairman and sales representative. I am familiar with different tools and devices about vehicle repair. And I also understand the sales skills towards different customers as a sales representative.
- Customer Service, Mathematics, basic programming tutorial: I worked in Baiyu Education China and I am working for PLAY AI AU to deliver personalized mathematics, Basic Programming and English tutoring to high school students, improving their academic performance. And also acted as a liaison between students and parents, effectively communicating progress and addressing client concerns to ensure satisfaction. Which means I am familiar with math/ English/ basic programming education and customer service. My experience working in an educational institution has honed my ability to communicate complex concepts clearly and manage tasks efficiently.
- Game Development & VFX: I have hands-on experience developing a 2D PVE shooting game in Unity. In this project, I led the VFX design, environment art, and UI/UX implementation. I am proficient in creating particle effects, post-processing renders, and cinematic animations. Furthermore, I possess a solid understanding of

C++ for Unreal Engine and Playmaker for AR/VR interactions. What's more, thanks to my role in different teams in university. I have experience in QA testing and understand how to fix bugs for different projects developed by different software.

- 3D Art & Modeling: I am skilled in Maya, Blender, and Substance Painter. For our university capstone project—a 3D FPS game—I created nearly all the 3D models, including environment assets and thematic buildings, ensuring they fit the specific visual style of the game.
- Full-Stack & Web Development: Beyond game engines, I am proficient in JavaScript, MongoDB, HTML, CSS and Python. I have experience in developing functional websites and managing databases, ensuring both backend logic and frontend visual design meet high standards. And I also have intermediate skill in webpage design. I have strong skill in Adobe photoshop and familiar with 2D art design. For database, I have experience in Oracle and familiar with SQL command to input and output data. I am a dedicated team player who understands the importance of project management and collaborative workflows in delivering successful IT products.

Thank you for considering my application. I have attached my resume for your review and welcome the opportunity to discuss how I can contribute to your team. I can learn very quickly. My English and Chinese are both fluent, I have a 485 visa with full working rights, and I'm looking for long-term, stable work in Australia. I'm hardworking, reliable, and willing to start from the ground up, learn fast and contribute as much as I can. I'm very committed and will not let the team down.

Sincerely,
Zhaomin Liu (Johnny)
